

# Machine Learning Engineer

## Requirements

- 3+ years of experience in machine learning, deep learning, or a closely related field
- Strong proficiency in Python
- Hands-on experience with a deep learning framework such as PyTorch or TensorFlow
- Experience training, evaluating, and deploying ML models to production
- Practical experience in at least one applied ML domain (e.g. computer vision or NLP)
- Bachelor's degree in Computer Science, Data Science, or a related field

## Preferred

- Experience with cloud platforms (AWS, GCP, or Azure)
- Experience with MLOps tooling (Docker, MLflow, Kubernetes)
- Publications, open-source contributions, or competition experience in ML
